

Installation in PrestaShop

You can obtain the module by downloading the following zip file: [prestashop-mastercard-1.0.0.zip](#) - the module is licensed using [OSL 3.0](#).

The module has been tested with the PrestaShop 1.7.4.4 and 1.7.5.0, and PHP 7.1 and 7.2.

Please refer to official Prestashop documentation for general installation guidelines <https://addons.prestashop.com/en/content/13-installing-modules>

This page relates to version 1.0.0

Need help?

Installation help should come from your Systems Integration building your site. If this is not available to you contact On Tap.

Make a backup!

Direct installation of PrestaShop module onto your production web site is not recommended or supported. We advise you to install this on a development version of your web site first to ensure correct operation with your particular PrestaShop installation.

In addition, we advise you to make a complete backup of your PrestaShop system (application files and database) before proceeding.
