

Visual Merchandiser

Create and merchandise categories quickly and easily with Visual Merchandiser for Magento. Drag-and-drop products into position, or set up 'Smart Categories' based upon attributes. Saves you hours merchandising your Magento store.

Watch Visual Merchandiser in action

Discover the ease at which you can merchandise your Magento categories with Visual Merchandiser from On Tap.

Our short demonstration video gives you a walk-through of all the key functionality and shows you the speed at which categories can be edited. Version 2.2.12 released

Maintenance release 2.2.12 was released on 14/06/2016. Customers with a support contract can download this at <http://www.ontapgroup.com/customer/account> in the 'My Products' section.

Visual merchandising – how it should be

No more laborious category management!
No more adjusting products' category positions manually by number!
With Visual Merchandiser, products can be re-organised in seconds – visually.
You see the products in place, with images, just like the customer sees them.

Features:

- [Drag-and-drop user interface](#)
- Merchandise an entire category in a single window
- Integrated product search to help you find products to include in your category
- [Customisable product meta data display](#) – showing stock, price and other attributes
- Instantly see stock availability as you merchandise
- Easily assign hundreds of products to a category in one action. Remove them just as easily.
- **New for version 2: Smart Categories allow you to create a rule for a category which allows products to automatically appear in it.**
- [Easy to install](#)

How to buy

You can find purchase information here: <https://www.ontapgroup.com/visual-merchandiser.html>
